At that time, my elder daughter was studying in the 10th standard and I had to take extra care of her by taking her to coaching classes, etc. In fact, she helped me a lot in the preparation of my history paper which had some portions in her syllabus. Both of us used to sit and prepare after her school/my office hours.

Out of around six lakh candidates who took the examination, 150 were to be selected in the written examination. This was further filtered to one third in the viva voce (oral examination). I took the written exam and got selected for the viva voce.

Meanwhile, as is common in a government setup, some persons had gone to court against this one-time examination and so UPSC's final selection list was locked in a court battle. Suddenly, after two years, one fine morning, one of my well-wishers and higher officers congratulated me. He informed me that UPSC had published the results of selected candidates that morning and my name was one among the coveted fifty selected officers. My joy knew no bounds and immediately Guruji's words calling me "AG Raji" rang in my ears as my immediate designation would be "Deputy Accountant General". His words had become true! I had tears of joy streaming down my face. He has made it happen!

Thus, I joined the IA&AS and became an Accountant General and worked for another 16 years as an IA&AS Officer and retired as an "Accountant General". The next wonder was that, during all those 16 years I had postings in South India only. My two daughters are now happily married and settled.

In 1984-85 itself, Guruji had decided to bless me with the AG post, which I could realize only in 1995. Even when I took the UPSC examination in 1995, it never occurred to me to link Guruji's calling me "AG Raji" with that opportunity.

This is the grace of Guruji to His devotees. My only prayer is that He should keep me and my daughters, always in His fold, and in all births to come!

Camp for women to commemorate World Women's Day falling on 8th March

The camp was held on 9th March, 2019. A total of 63 women attended.

They were given thorough general check-up, weight and blood pressure were recorded. Breast and pelvic examinations were done to detect the presence of lump masses, ulcers, etc.

About 18 of them were either obese or over-weight. All these women had knee joint pain due to body weight.

All of them were advised about the importance of self- breast examination, prevention of anaemia and osteoporosis and regular exercises and walking for reducing body weight and obesity.

The ladies disbursed after having a nutritious meal. All were given iron, calcium tablets and deworming tablets.

One lady had hypertension, one had diabetes mellitus and another had fibrocystic breast disease.
