## 19th Feb. 2011 – DMS Annual Congregation Day at Alamadhi, near Redhills

It is the practice to invite persons with leprosy to join in this congregation and offer prayers and have lunch

Persons with leprosy being served lunch

Persons with Leprosy offering prayers to the Vigrahm of Shri Kamakshi Baba

### The DMS – ENVIKAL Centre of Technical Excellence starts a new activity – Training Teachers!

Teachers' Training in Computers

Trainers deputized by Future Focus Infotech P.Ltd.

The place for doing Homam opposite to Guruji's Vigrahm at our Centre does not have a super structure and whilst doing Homam the members are exposed to the sun above directly. About a month back, a devotee Mr.V.E.Somasundaram, GM, KEC International has organised the erection of the super structure and has sponsored the entire cost himself. We thank him immensely for doing this. Two photos of the newly constructed super structure are shown below.

Dear Member,

We carry below an instance about Guruji, narrated by Shri Mukund Mama, elder brother of Guruji:

June 1984, Kazipet: Friday Prayers were always a grand affair.

In Andhra Pradesh, Karim Nagar was the hub of hard-core naxalites. But there was one naxalite aged about 60 years who became spiritually inclined. (We shall call him as Kondapalli P.R. – KPR for short). He was dalom leader of the naxalites gang aged about 60 years. He arrived by his car with two bodyguards fully armed to see Guruji and attend the Friday pooja.

His desire was to give up dalom function and terrorism. He had worked in the dalom for 40 years.

In the house opposite to where Guruji resided, there lived a superintendent of police in charge of anti naxalite squad. KPR was wanted dead or alive by the squad.

Knowing that KPR has come for the prayer, the Superintendent suddenly appeared for the prayers hiding his revolver in his dhoti. Seeing the police officer KPR readied the revolver in his right hand, which was hidden in his shirt & dhoti and was ready for escape.

Guruji was in deep prayers. He came to know of the happenings in the house with His siddhi powers and that there could be firing. He prayed to the Divine Mother and within moments all the bullets from both the guns were in Guruji's hands. He secured them in His dhoti at His waist.

He told the gathering “This is a place of worship and is not meant for gun fight and bloodshed”.

Pooja was over by 8pm and after having the prasadams, all the devotees left excepting the two i.e. KPR & the Superintendent of Police. Each one was afraid to leave, because of the gun the other had. Guruji told them, “Both your revolvers are empty and the bullets are here with me”. Guruji showed the bullets to them and then said to both of them “The bullets will come back to the revolver once KPR reaches his home”.

At once KPR fell out of Dalom. The naxalites wanted to kill him. They waited till Guruji left Kazipet. As soon as He left Kazipet, KPR's entire property including cooking gas and vessels were taken away by the naxals. We are informed that KPR died at the age of 70, about ten years after this incident.

## 19th Feb. Reports

From the Doctor's desk

Dr. Geetha Badrinath

Year after year it has become my pleasant duty to present the activities of the medical centre. When we go up a hill or mountain, we turn back to see how far we have climbed - similarly we look back at the bygone year to see what we have achieved. Our activities are four pronged – curative. treating patients who visit us and identifying problem cases – preventive – giving antenatal check up, immunisation and rubella vaccine – school health – checking school children who come to our tuition classes – and project Kamakshi, our well girl child project.

The no.of patients attending the centre are slowly and steadily increasing. A no.of problem cases were identified and referred to tertiary care hospitals.

### Prasad – the kid on dialysis

An interesting case I wish to present is that of Prasad who came here last Feb 19. with CRF, on dialysis and very ill waiting for renal transplant. He approached me for help to undergo the procedure. Luckily for him a philanthropic lady who wishes to be anonymous donated two lakh rupees which enabled him to have a successful transplant. He is now standing in our midst, normal + healthy. But he requires immuni suppressive medication to prevent rejection of the transplanted kidney – these medicines are very expensive i.e he needs Rs.600 / day for life long immuni suppression – now this gave me the idea to select a new project – preventive nephrology clinic – at our centre.

Pregnant women coming to our centre get free antenatal checkup. They are given iron, folic acid tablets, calcium and injection of TT. Children too get immunization. Girls in the age group 12 & above are given Rubella vaccine, to prevent rubella syndrome in their off-springs. We plan to extend the rubella vaccination to all the school children (girls) coming to our tuition classes also.

### Rubella program

Our Rubella prevention programs started with Vishnu whom all of you are familiar with. His mother had rubella during pregnancy because of which he was born with cataract, absent external ear and undescended testes. His cataract surgery was done last year and this year both his testes were brought to the scrotum from his abdomen where they were. He is during our well at school scoring 100% marks in maths & is now waiting for a ear.

School health has been a main function for us from the beginning. Over 200 school children attending our coaching classes were given 2 rounds of checkup. They were given deworming tablets, iron, calcium, vitamins and sometimes treatment for minor ailments. Many of them have gained weight. And now to our project Kamakshi – the well girl child project. We registered 500 girl children in the age 0-18 from the neighbouring village – they are weighed every month, problems are treated and vitamins and immunisations are given.

Mothers are educated on nutrition and child rearing. Rubella vaccine was administered to girls above 12 years. Our target is to cover 5000 children.

## Well woman clinic and Preventive nephrology

And now for the future – 2 new projects. The well woman clinic and preventive nephrology clinic. The well woman clinic aims at covering all the women in the neighbouring villages, screen them for anemia, breast and cervical cancer, diabetes, hypertension and other related problem. Cancer of breast & uterus are the no. one killers and if detected early are fully curable.

The preventive nephrology idea was conceived after seeing Prasad, a renal failure patient – lakhs of rupees are required to fight renal failure – instead if we strive to prevent renal diseases, it will be worthwhile. Diabetes and hypertension are the two conditions that damage the kidney. Preventive nephrology aims at control of these two conditions and educating the patient against indiscriminated consumption of medicines that damage the kidney.

The most important milestone for us to reach is to make “ The Kamakshi Baba Hospital ” a reality. The idea mooted last year is yet to take off.

“Lives of great men, all remind us that we can make our lives sublime. And parting leave behind us foot prints on the sands of time.”

Yes, we too should leave foot prints in the form of a good hospital that will help all the sick people in this area and serve as a fitting monument for our Guruji.

**-Dr. Mrs.Geetha Badrinath**

~~~~~

This issue of Satsanga carries with it a passport size photo of Shri Kamakshi Baba at the Redhills Centre with a 2011 Calendar on the rear. This photo is sponsored by Shri A.V.N. Rao (Bhushi), Member, Hyderabad. We thank him for his gesture.

[illegible]

Donors to the 19th feb. Function have generated a contribution of three and a half lakhs in the aggregate. Thank you every one of you! The list of donors is appended to this Satsanga.

.....

**Donors contributing Rs.500/- and above for the Feb.19th function to DIVINE MOTHER SOCIETY & DMS TRUST**

| S.No | Name                      | Amount(Rs.) |
|------|---------------------------|-------------|
